

# Raymond Cancino

Web Developer | JavaScript | VueJS  
| ReactJS Developer

I'm a mechanical engineer who successfully transitioned into the tech industry as a web developer, and now I'm searching for a software development position where I can put my skills to good use and benefit the company.

## EDUCATION

### Bachelor of Science in Mechanical Engineering

Pangasinan State University - Urdaneta City Campus

06/2013 - 01/2020

## PERSONAL PROJECTS

### Face Recognition Apps

- This is a fullstack project. It has a sign in and register function and will recognize a face in the photo by the use of Clarifai API. React is used in the frontend, NodeJS and ExpressJS in the Backend and Postgresql for the database. Render is used for the deployment of the project.

### Monster Rolodex

- This project is made up of HTML/CSS, TypeScript and React as a framework. I also use an API - Robohash API for generating a random icon in the card component. It also have a search function to locate a name in the card component.

## WORK EXPERIENCE

### Junior Web Developer

GrandShipper Inc.

07/2022 - Present

#### Achievements/Tasks

- Managing the complete software development process from conception to deployment
- Maintaining and upgrading the software following deployment

### Production Division's Staff

Sumi North Philippines Wiring System

08/2021 - 04/2022

Linmasangan, North Aero Industrial Park, Binalonan, Pangasinan

#### Achievements/Tasks

- Designing and improving the process in the production
- Managing a team in production

### Assistant Instructor 5

Virgen Milagrosa University Foundation

08/2020

Dr. Martin P. Posadas Avenue, San Carlos City, 2420 Pangasinan

#### Achievements/Tasks

- Part-time instructor teaching engineering student in the university.
